

创新·高效·节能 螺优卓越品质

INNOVATE-HIGH EFFICIENCY-ENERGY CONSERVATION EXCELLENT QUALITY

# CONTENTS

## 目录

螺优致力于服务全球的用户  
LUOYOU DEDICATED TO SERVING USERS AROUND THE WORLD

01 企业概况 01/06

- 01/02.企业简介
- 03/04.展望未来/公司荣誉
- 05/06.我们的优势

02 永磁变频系列 07/11

- 07/08.油冷永磁变频螺杆空压机
- 09/10.风冷永磁变频螺杆空压机
- 11.永磁变频技术参数

03 双级压缩系列 12/16

- 12-15.双级压缩永磁变频螺杆空压机
- 16.双级压缩技术参数

04 定制低压系列 17/20

- 17/18.节能无油螺杆鼓风机
- 19/20.节能无油螺杆鼓风机技术参数

05 无油鼓风机系列 21/22

- 21.定制低压节能螺杆空压机
- 22.低压空机技术参数

06 激光切割系列 23/25

- 23/24.激光切割专用螺杆空压机
- 25.激光切割专用压缩机技术参数

07 售后服务 26

## 油冷永磁变频螺杆空压机

OIL-COOLED PERMANENT MAGNET  
VARIABLE FREQUENCY SCREW AIR COMPRESSOR

### 产品特点

- 德国原装进口主机；
- 进口主机首家与永磁电机对接；
- 功率范围:7.5kw-55kw, 电机转速3000rpm；
- 服务系数:1.2；
- 无轴承, 无编码器方案；
- 采用独特的真空环氧浸漆方案, 提高电机的绝缘等级和绕组的散热能力；
- 结合客户的机械结构, 整体防护等级可达IP65, 减少灰尘, 烟雾等对电机寿命的影响；
- 转子表面采用进口碳纤维套管和铁芯采用冲片方案, 降低转子惯量, 降低电机启动电流, 增加电机的响应率；
- 体积小, 噪音低；
- 模式锥度联接设计, 电机易于安装和拆卸, 最高转速时电机效率最高可达100%。
- 排气端采用圆锥滚珠轴承, 进气口采用圆柱轴承, 寿命长。

### Features

- Main engine imported from Germany;
- The first imported host machine is connected with permanent magnet motor;
- Power range: 7.5KW-55KW, motor speed: 3000rpm;
- Service coefficient: 1.2;
- No bearing, no encoder scheme;
- The unique vacuum epoxy immersion scheme is adopted to improve the insulation grade and heat dissipation capacity of the windings.
- Combined with the customer's mechanical structure, the overall protection level can reach IP65, reducing the impact of dust and smoke on the motor life;
- The rotor surface adopts the imported carbon fiber sleeve and the iron core adopts the punching scheme, which reduces the rotor inertia, reduces the motor starting current, and increases the motor response rate.
- Small size, low noise;
- Mode taper connection design, motor easy to install and disassemble, motor efficiency at the highest speed up to 100%.
- The exhaust end adopts tapered ball bearing and the inlet adopts cylindrical bearing, which has a long service life.

## 主要优势

- 结构上采用一体转动联接设计：电机和机头采用模式锥度联接设计或直轴联接设计，安装和拆卸更加便捷；
- 采用无轴承和无编码器方案：免定期注油脂、免定期更换轴承；
- 高功率体积比、扭矩体积比：电机体积只有相同功率普通电机的1/3，功率体积比和扭矩比普通电机的2~3倍；
- 高IP等级：电机最高防护等级可达IP65；
- 电机效率更高：其效率最高可达97%~98%，达到国家一级能效水平，相对于普通电机平均节电率可达30%。

## Advantage

- Integrated rotating connection design is adopted in the structure: the motor and the head adopt taper connection design or straight shaft connection design, which is more convenient for installation and disassembly.
- Adopt bearingless and encoder less scheme: no regular grease injection, no regular replacement of bearings;
- High power volume ratio and torque volume ratio: the volume of the motor is only 1/3 of that of the ordinary motor of the same power, and the power volume ratio and torque are 2~3 times of that of the ordinary motor;
- High IP level: the highest protection level of the motor can reach Ip65;
- Higher efficiency of motor: its efficiency can reach up to 97%~98%, reaching the national level of energy efficiency, compared with the average power saving rate of ordinary motor can reach 30%.

An example of a motor on an air compressor

### 目前行业永磁电机存在的问题

Current problems of permanent magnet motors in the industry

失磁  
Excitation-loss

高温失磁  
High temperature field loss

难维护  
Difficult to maintain

机头难修  
The nose is difficult to repair

### 如何解决和控制电机不失磁

How to solve and control the motor magnetic loss

提高电机的防护等级  
Improve the protection grade of the motor

冷却方式-油冷  
Cooling method - oil cooling

冷却效果  
Cooling effect

提高电机永磁体牌号  
Raise the permanent magnet brand of motor

使用可靠的供应商, 工艺保证  
Use reliable supplier and process guarantee

## 风冷永磁变频螺杆空压机

AIR-COOLED PERMANENT MAGNET  
VARIABLE FREQUENCY SCREW AIR COMPRESSOR

- 进口主机首家与永磁电机直接对接；
- 排气端采用圆锥滚珠轴承，进气口采用圆柱轴承，寿命长，相对同功率的普通机型，更大规格的主机，排气量大。

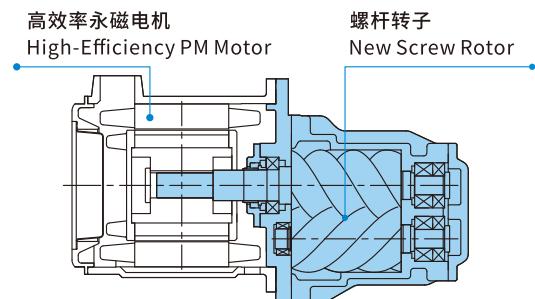

- The first imported host machine is directly connected with the permanent magnet motor;
- The exhaust end USES tapered ball bearing, the intake USES cylindrical bearing, the service life is long, relative to the same power of the ordinary model, the larger size of the main engine, large air displacement.

### 一体轴结构

- 高效永磁电机与螺杆阳转子采用内嵌式一体轴直联结构，传动效率100%，无齿轮箱、无皮带无传动效率损失，相比更节能。
- 装备了高效永磁电机，在低频低速时，仍能保持很高的机械效率。
- 永磁电机采用高效能铁硼永磁体，节能性能卓越。电机定子采用变频器专用耐电晕漆包线，绝缘性能佳，使用寿命长。软启动，运行时，电机电流不超过满载电流，减少了对电网设备的冲击。

### Integral shaft structure.

- The high efficiency permanent magnet motor and screw rotor adopt the embedded integrated shaft direct connection structure, the transmission efficiency is 100%, no gearbox, no belt, no transmission efficiency loss, compared with more energy saving.
- Equipped with high efficiency permanent magnet motor, it can maintain high mechanical efficiency at low and low frequency.
- Permanent magnet motor adopts high efficiency iron and boron permanent magnet, which has excellent energy saving performance. The motor stator adopts special corona resistant lacquered wire of frequency converter, which has good insulation performance and long service life. Soft start, running, motor current does not exceed full load current, reduce the impact on the power network equipment.

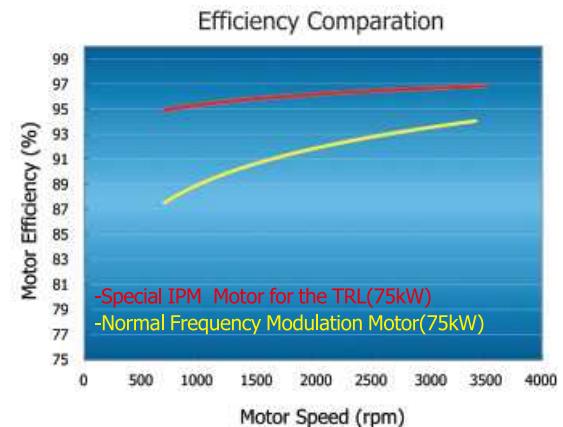

## 杜绝无用功率损耗

■ 压力传感器检测排气口的压力,把信号传输给PLC,PLC根据压力传感器的压力大小来控制变频器的输出频率。当压力大时,减小频率;当压力小时,增大频率,使压力始终恒定。压缩机通过变频器来控制永磁电机转速,这样就组成了一个变频闭环控制系统。实现恒压供气、多用多产、少用少产、不用即停、有用即变频启动产气,彻底杜绝了无用功的能源损耗。

### Eliminate useless power loss

■ The pressure sensor detects the pressure of the exhaust port and transmits the signal to PLC, which controls the output frequency of the inverter according to the pressure of the pressure sensor. When the pressure is high, reduce the frequency; When the pressure is small, increase the frequency so that the pressure is always constant. The compressor controls the speed of the permanent magnet motor through a frequency converter, thus forming a frequency conversion closed-loop control system. Achieve constant pressure gas supply, more productive, less use and less production, no stop, useful variable frequency start gas production, completely eliminate useless energy consumption.

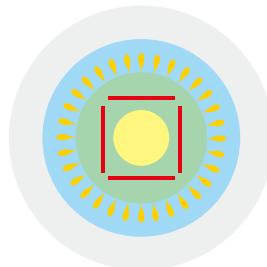

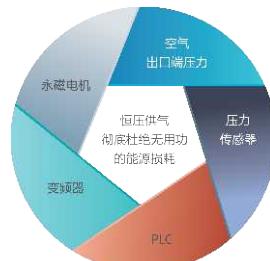

## 工作频率范围更广阔、噪音更低

■ 变频范围从25%-100%,系统用汽波动越大,节能效果越明显。正常运行噪音为65db,低噪音运行更适合于任何场所。  
 ■ 购买螺杆机时,传统意义上的成本(即购买成本与保养成本),其比例只占到总成本的25%,而能源消耗却占到75%。永磁变频螺杆比普通工频螺杆机可能35%以上。  
 ■ LY系列4级永磁变频空压机专用高效电机较其它厂家8级永磁电机相比,具有额定频率较低,涡流损耗较小、发热量较小、效率较高的优势。更适合3000转使用场合;转子为永磁体内嵌式结构,区别于市场上8级永磁体表贴式结构,具有更好的结构稳定性,磁钢不易受离心力影响而飞出。同时可更好的利用磁阻转矩,使电机的功率密度提升,电机结构更加紧凑,重量、体积、成本上均有优势。

### Operating frequency range is wider and noise is lower

■ The range of frequency conversion is from 25% to 100%. The greater the fluctuation of system steam, the more obvious the energy saving effect is. Normal operation noise is 65dB, low noise operation is more suitable for any place.  
 ■ When purchasing a screw machine, the traditional cost (i.e. purchase cost and maintenance cost) accounts for only 25% of the total cost, while energy consumption accounts for 75%. Permanent magnet variable frequency screw machine than normal frequency screw machine may be more than 35%.  
 ■ LY series 4-stage permanent magnet inverter air compressor dedicated high efficiency motor compared with other manufacturers of 8-stage permanent magnet motor, has the advantages of lower rated frequency, less eddy current loss, less calorification and higher efficiency. More suitable for 3000 turn occasions; The rotor is a permanent magnet body embedded structure, which is different from the 8-level permanent magnet body surface tip structure on the market. It has better structural stability, and the magnetic steel is not susceptible to centrifugal force and flies out. At the same time, magnetoresistance torque can be better used to improve the power density of the motor, the motor structure is more compact, weight, volume, cost advantages.

## 双级压缩永磁变频螺杆空压机

TWO-STAGE COMPRESSION PERMANENT MAGNET  
VARIABLE FREQUENCY SCREW AIR COMPRESSOR

### 高效主机

- 选用高效,大排量主机,节能永磁电机,真正做到功率小,大排量;
- 大转子,转速低,效率高,噪音低,振动小,能耗低。

### Efficient host

- High efficiency, large displacement Main engine, energy-saving permanent magnet motor, Really do small power, big Displacement;
- Large rotor, low speed, High efficiency, low noise, vibration Small, low energy consumption.

### 永磁电机

- 启动转矩大,绝缘等级F级,防护等级IP54,SKF轴承,噪音低,寿命长,具有加油装置,可不停机加油。

### Permanent magnet motor

- High start torque, insulationLevel F, level of protectionIP54, SKF bearing, noiseLow, long life, with refuelingDevice, without stopping for refueling.

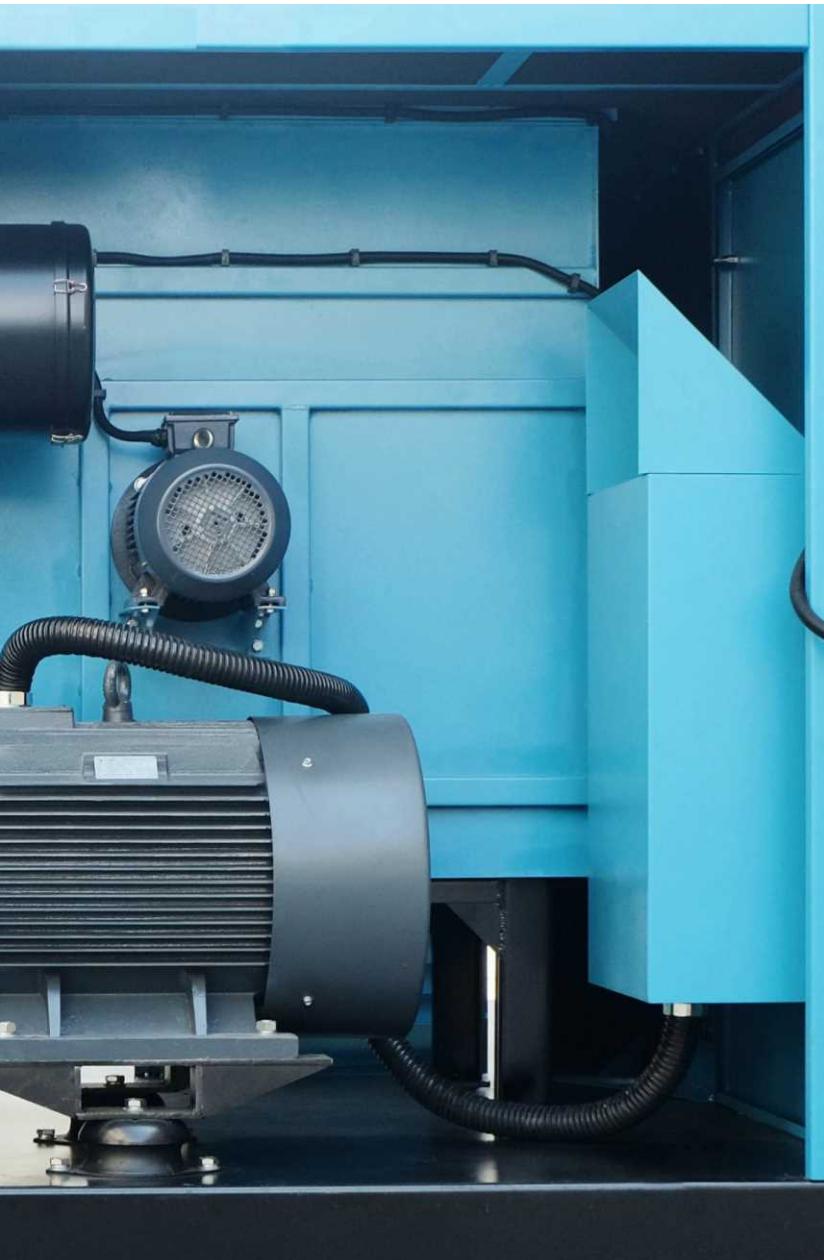

### PM控制系统

- 一体式变频控制器,人性化结构设计世界名牌电控元件,安全可靠,操作简便可于多种通讯控制系统的集成宽广的通讯功能。

### Permanent magnet motor

- Integrated variable frequency control Machine, humanized structure design World famous electronic control components, Safe and reliable, easy to operate Can be controlled in a variety of communication The system integration is broad Inquiry function.

### 油气分离

■ 超大容量的油气分离器，品质优越的滤纸，含油量控制在2PPM以下，保证压缩空气的高质量新型设计，显著降低进气阻力。

### Oil and gas separation

■ Super capacity of oil and gasSeparator, superior quality filter paper,The oil content is controlled at 2PPMBelow, make sure the compressed air is high New design of quality, significantly reducedLow intake resistance.

### 高效进气阀

■ 大口径，低消耗。提高系统的稳定性，确保启动，运转及停机阶段有效地调节控制流量。

### High efficiency intake valve

■ Large diameter, low consumption. mentionHigh system stability ensuresStart up, run up and down stageEffectively regulate and control flow rate.

### 冷却系统

■ 低功耗，低噪音，轴流冷却风扇，采用进气消声设计，合理冷却系统设计，可靠性的关键。

### The cooling system

■ Low power consumption, low noise,Axial flow cooling fan, adopt feedAir noise elimination design, reasonable coolingSystem design, reliabilityThe key.

## 双级压缩永磁变频螺杆空压机

TWO-STAGE COMPRESSION PERMANENT MAGNET  
VARIABLE FREQUENCY SCREW AIR COMPRESSOR

### 双级压缩原理

■ 空气经过一级压缩后，通过强化喷油冷却，降低二级空气温度，空气进行等压缩，降低压缩功。两级压缩采用等压比来设定级间压力，故每级压缩比都要比单级压缩比降低很多，转子之间的回流泄露量大大降低了，容积效率和绝热效率得到了大大提高，相应的提升了压缩的产气量。在相同的功率下两级压缩比单级压缩产气量高达15%，可实现多达15%的节能效果。

### The principle of two-stage compression

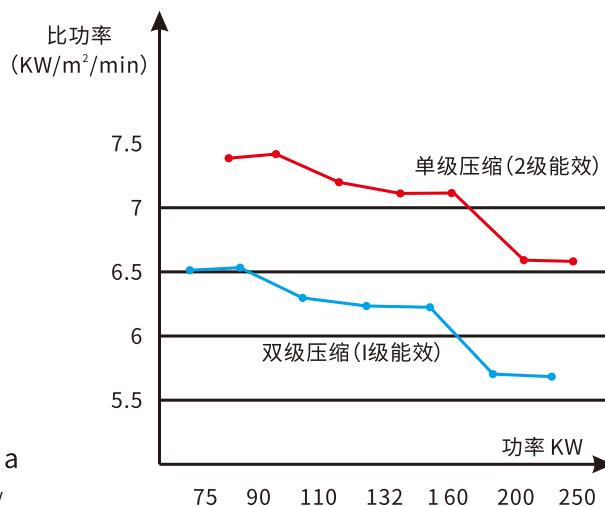

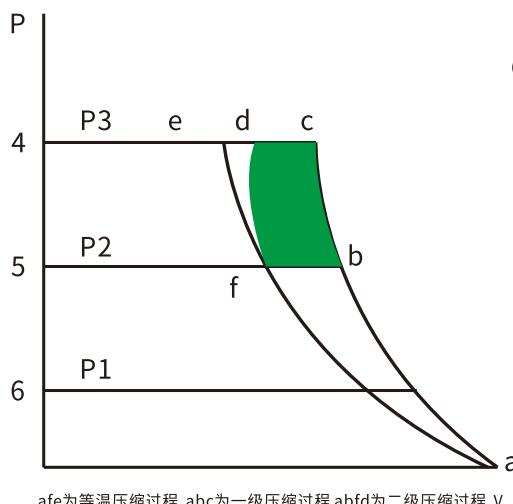

■ After the first stage compression, the air is cooled by enhanced oil injection to reduce the temperature of the second stage air, and the air is equally compressed to reduce the compression work. The isobaric ratio is used to set the pressure between two stages of compression, so the compression ratio of each stage is much lower than that of the single stage, the backflow leakage between the rotors is greatly reduced, the volumetric efficiency and adiabatic efficiency are greatly improved, and the compressed gas production is correspondingly increased. Under the same power, the gas production of two-stage compression is up to 15% than that of single-stage compression, which can achieve up to 15% energy saving effect.

### 双级压缩原理的优势

- 比单级压缩工作温度低，趋于更省功的等温压缩，理论节能8%。
- 每级压缩比更低，内泄露减少，容积率提升5%~8%。
- 利于调整每级转子达到更佳线速范围25~35m/s，获得更高压缩传递效率。

### Advantages of the two-stage compression principle

- Compared with single-stage compression, isothermal compression tends to save more work and theoretical energy saving 8%.
- The compression ratio of each stage is lower, the internal leakage is reduced, and the volume ratio is increased by 5%~8%.
- It is beneficial to adjust the rotor of each stage to reach a better linear speed range of 25~35m/s to obtain a higher compression transfer efficiency.

## 节能无油螺杆鼓风机

ENERGY-SAVING OIL-FREE SCREW BLOWER

「噪音低、能耗低、高效率，节能40%用电量」

### 性能介绍

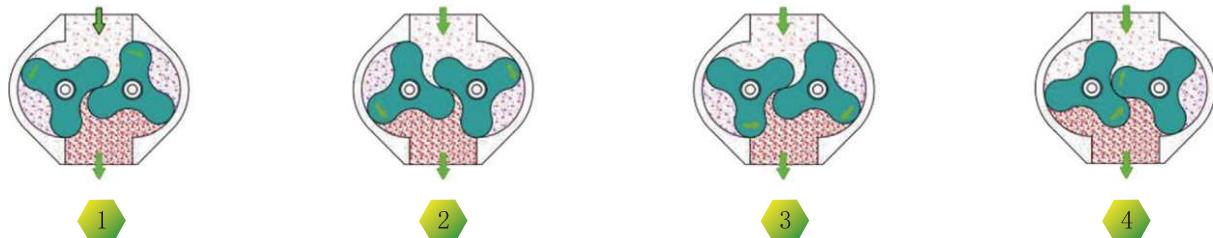

- 采用转子鼓风机设计的无油双螺杆主机优化的线型设计，使其具备更高的效率先进的涂层技术，使得转子间隙更小，提高了容积效率的同时，压力、有效的保护了转子，寿命更长采用世界知名品牌轴承以保障其可靠性。
- 采用国标5级精密级同步齿轮和驱动齿轮，保障可靠性和延长使用寿命独特的润滑和排油通道，保障轴承和齿轮得到良好的润滑和冷却，同时提升主机效率迷宫式密封+碳环式密封的组合来实现压缩腔与润滑油、气隔离，保障空气100%无油由于压缩气体无油润滑，使整机系统无需油气分离，结构更加简单。

### Performance is introduced

- The optimized linear design of the oil-free twin screw main engine with rotor blower makes it have higher efficiency and advanced coating technology, which makes the rotor clearance smaller, improves the volume efficiency, and at the same time, effectively protects the rotor with pressure and longer service life. World-renowned bearings are adopted to ensure its reliability.
- Levels using national standard 5 precision synchronous gear and driven gear, guarantee the reliability and prolong the service life of the unique lubrication and oil discharge channel, ensuring bearing and gear to get the good lubrication and cooling, at the same time, promote efficiency of the host labyrinth seal + carbon ring seal combination to realize the compression chamber and lubricating oil, gas separation, guarantee 100% oil free air due to the compressed gas without oil lubrication, so the system without oil and gas separation, structure more simple.

## 罗茨鼓风机工作原理

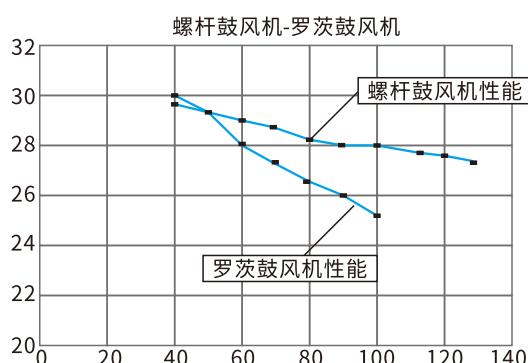

How roots blower works

①吸气过程。②-③内部恒压输送。④外部压缩、排气过程。

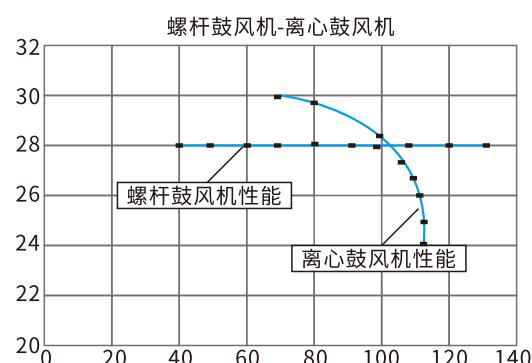

① 吸气过程。②-③ 内部压缩过程。④ 排气过程。

传统罗茨鼓风机  
在80Kpa压力下,提供1600m<sup>3</sup>/h的流量,  
所需平均能耗61KW

Traditional Roots blower  
At a pressure of 80Kpa, flow rate of  
1600m<sup>3</sup>/h is provided.  
The average energy consumption is 61KW

螺杆鼓风机-离心鼓风机  
在80Kpa压力下,提供1600m<sup>3</sup>/h的流量,  
所需平均能耗42KW

Luoyou oil - free screw blower  
At a pressure of 80Kpa, flow rate of  
1600m<sup>3</sup>/h is provided.  
The average energy consumption is 42KW

## 节能无油螺杆鼓风机技术参数

TECHNICAL PARAMETERS OF ENERGY-SAVING OIL-FREE SCREW BLOWER

## 应用领域

Application field

污水处理/Sewage treatment  
物料输送/conveying  
纺织工程 / Textile engineering  
食品医疗行业/Food and Medical industry

生物制药 / biopharmaceutical  
镀锌/galvanized  
脱硫脱硝 /desulfurization and denitrification  
其他诸多领域/Many other areas

创新·高效·节能

Innovate-high Efficiency-energy Conservation

## 定制低压节能螺杆空压机

CUSTOMIZED LOW-VOLTAGE ENERGY-SAVING  
SCREW AIR COMPRESSOR

「低压定制/产气量大  
效率高/更稳定」

## 针对不同行业特性进行个性化定制开发 Customized development for different industry characteristics

>纺织行业  
针对用气量大，气压低，压力要求稳定、棉絮多等特点，对设备进行特别设计改良。

>Textile industry  
For large amount of air, low pressure, pressure stability, cotton batting and so on.  
YeahThe equipment is specially designed and improved.

>水泥行业  
针对气压低、气量大、用气环境恶劣等特点。  
>Cement industry  
For low pressure, large air volume, gas useAdverse environment and other characteristics.

>陶瓷行业  
针对陶瓷行业气量大，用气环境恶劣，粉尘多等特点。  
>Ceramic industry  
For the ceramic industry  
gas volume, with gasBad environment, dust and other characteristics.

>玻璃行业  
针对该行业持续用气时间长、不能停机、气压低、气量大、用气环境恶劣等特点。  
>Glass industry  
In view of the long duration of gas consumption in this industry, Can not stop, low pressure, large air volume, useGas environment and other characteristics.

## 低压空压机技术参数

TECHNICAL PARAMETERS OF  
LOW PRESSURE AIR COMPRESSOR

### 低压永磁变频螺杆机技术参数-0.5Mpa

Technical parameters of low-voltage permanent magnet variable frequency screw machine -0.5Mpa

型号	LY-22	LY-37	LY-45	LY-55	LY-75	LY-90	LY-110	LY-132	LY-160	LY-200
排气压力(MPa)	0.5									
排气量(m³/min)	5.0	8.0	10.5	13.5	16.5	22.7	25.2	30.0	39.6	45.5
排气功率(KW)	22	37	45	55	75	90	110	132	160	200
排气接口	G1 1/2	DN50	DN50	DN50	DN65	DN80	DN80	DN100	DN100	DN125
噪声(dB)	65±2	70±2	70±2	70±2	72±2	72±2	72±2	75±2	75±2	78±2

创新·高效·节能

Innovate-high Efficiency-energy Conservation

## 激光切割专用螺杆空压机 LASER CUTTING SCREW AIR COMPRESSOR

「占地面積小/使用更便捷/空氣更純淨」

### Product features

- Laser cutting is a new kind of high-tech cutting technology, which USES energy laser beam to cut, and has the advantages of high cutting efficiency and smooth machining end face. It is widely used in machinery, hardware and other industries. For the air source used by laser cutting (oxygen, nitrogen, air), air has its unique advantages, low cost, cutting some materials can exceed the effect of oxygen and nitrogen, the system has been successfully used in the laser cutting industry.
- The biggest advantage of laser cutting combined air compressor: small space, smooth operation, high purity of compressor air processing, fully meet the requirements of laser cutting.
- Laser cutting has a very high requirement of oil-free, water-free and dust-free. In light cases, it has a direct impact on the cutting effect. In heavy cases, protective lenses and focusing lenses will be burned out. Based on the above requirements, our company has carried out technical upgrading and transformation, and at the same time, carried out close technical cooperation with the top filter manufacturers in Europe, and completed this laser cutting combined air pressure system, which makes the supporting laser machine manufacturers and users at ease.

- VS
- 空间更节省：体积小，占空间小；
  - 减少维护费用：省钱，省力更省心；
  - 节省安装费用：无需安装，接电即可运行。
  - More space saving: small volume, small space;
  - Reduce maintenance costs: save money, save effort and worry;
  - Save installation cost: no installation is required and can be operated by power connection.

- 空间占比大：需要建设一个空压站来运行；
- 维护及管路漏气多：管路多，压损大，耗能大；
- 安装费用大：安装繁琐，还需要准备多种供电电源。
- Large space proportion: it is necessary to build an air compressor station for operation;
- Maintenance and pipeline leakage: more pipelines, high pressure loss, high energy consumption;
- Expensive installation: cumbersome installation, but also need to prepare a variety of power supply.

## 激光切割专用压缩机技术参数

### LASER CUTTING SPECIAL COMPRESSOR TECHNICAL PARAMETERS

**激光切割专用空压系统技术参数(压力1.58Mpa)**

## 售后服务

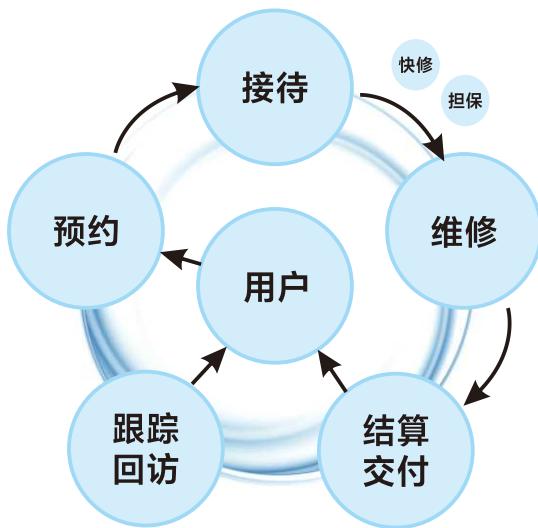

ENERGY SAVING SOLUTION

### 安心的售后

螺优非常重视售后服务，我们最大程度地关注客户对于服务和配件的所有要求，所有备件将在最短时间内送达用户指定的地点，此外，根据客户需要，我们将派遣服务工程师前往运作现场并提供帮助。

#### Secure after sale

Luoyou attaches great importance to after-sales service, we pay the greatest attention to customer's service and accessories. All spare parts will be delivered to the user's designated location in the shortest possible time. In addition, We will dispatch service engineers to the operation site and provide assistance according to customer needs.

### 快速专业的售后服务

螺优拥有专业的售后服务团队，在全国各地主要城市，均设有售后服务点，为客户提供及时专业的服务支持以及正品原装零件供应

- ◆ 提供专业的开机调试服务和用户培训指导；
- ◆ 4小时快速响应，24小时到达现场服务；
- ◆ 专业人员，专业工具提供故障诊断和维修服务；
- ◆ 定期上门巡检，提供计划性维护保养建议；
- ◆ 提供主动咨询服务，优化设备运行管理，提高能效；
- ◆ 提供节能改造优化服务。

#### Quick and professional after - sales service

Luo you has a professional after-sales service team, in major cities throughout the country, have set up after-sales service points, to provide timely professional customersService support and original parts supply

- ◆ Provide professional startup debugging services and user training guidance;
- ◆ 4 hours quick response, 24 hours arrive at the scene service;
- ◆ Professional staff, professional tools to provide fault diagnosis and maintenance services;
- ◆ Regular visit inspection, provide planned maintenance advice;
- ◆ Provide active consulting services, optimize equipment operation and management, improve energy efficiency;
- ◆ To provide energy-saving renovation and optimization services.
